

**INTRODUCTORY LECTURES GUIDE FOR STUDENTS
MEDICINE 251 – INTEGRATED CLINICAL CLERKSHIP IN MEDICINE II**

Description of Activity:

This part of the module contains lectures and monographs that we discuss what we feel are essential skills and must know topics for clinical clerks to develop in order to handle clinical work in the department.

Learning Objectives:

At the end of the lectures, students should be able to:

- Interpret the results of the tests listed below and correlate these results to possible clinical findings
 - ECG
 - ABG
 - Chest x-ray
- Identify key Concepts in Fluid and Electrolyte Management
- Define telemedicine and identify its advantages and disadvantages
- Identify key points in must know topics in Medicine 251

Activity Resource Material/s

For your 1st week of rotation, you are asked to go through 5 annotated lectures. These annotated lectures by our faculty are all available at the course site. These are:

1. ECG Interpretation
2. ABG Interpretation
3. Chest x-ray Reading
4. Fluids and Electrolytes
5. Telemedicine

They can be accessed at your own pace. The total expected time for viewing these 5 lectures is 7 to 8 hours. A Discussion Board/Chat Portal will be opened for your questions or points for clarification.

Also available in the course site are Monographs as prepared by Clinical Clerks for AY 2019 – 2020. These cover some of the Essential Topics and Skills for Medicine 251. While these are not required reading, you may opt to go through them to help you understand these topics.
