

N101 Nursing Informatics
First Semester AY 2023-2024

Evaluation of a Health Application

Prerequisite to this activity is the use of a health application for at least two (2) weeks

Instructions:

1. Take a screenshot of the application name and logo, and its homepage/main page.
2. Describe the application, its main use/s, and its features.
3. Using a maximum of 500 words, evaluate the following components of the application:
 - * Ease of use and satisfaction
 - * System information arrangement
 - * Usefulness

Note: You can use the mHealth app usability questionnaire (MAUQ) as a guide to completely evaluate the health app

4. Using a maximum of 100 words, indicate your recommendations for a better user experience for the selected application.
5. Upload your evaluation in PDF format titled FAMILYNAME_Evaluation_NameOfApp

Rubric for grading

Criteria	Per Item Credit			Total Points
	Full point	Half point	No point	
Description	Complete with description and features	Only described or only indicated features	Did not describe application/features	3
Ease of use and satisfaction	All 8 items were evaluated	5-7 items were evaluated	0-4 items were evaluated	3
System information arrangement	All 6 items were evaluated	3-5 items were evaluated	0-2 items were evaluated	3
Usefulness	All 7 items were evaluated	4-6 items were evaluated	0-3 items were evaluated	3
User experience	Clear and concise recommendation for user experience	Clear or concise recommendation but not necessarily on user experience	Unclear recommendations without bases	3
			Total	15
