

N-117: Nursing Care of the Chronically-III and the Older Persons
Second Semester, AY 2023-2024

Activity Guide 3
Nursing Care of an Older Person

Instructions

Answer the following based on the health condition of the older person you assessed:

1. Enumerate the geriatric syndromes or geriatric health concerns observed in the patient and explain each by relating it with the presenting signs and symptoms and brief pathophysiologic mechanism.
2. What is the plan of care? Develop a nursing care plan for each health condition identified.
3. What are other assessment data necessary to be gathered? What tools will you use?

This is a group activity. Refer to the group assignment posted in VLE. Submission is on March 14, 2024. Each group member will submit a peer evaluation form which will reflect the accomplished responsibilities of each member of the group during the given activity. Submit the form in the respective submission bin.
